Web Application Technologies and Django, Web application

2021 - 2021

In this course, I learned the basic structure of a web application, and how a web browser interacts with a web server. I explored the Hypertext Transfer Protocol (HTTP) request/response cycle, including GET/POST/Redirect. I also gain an introductory understanding of Hypertext Markup Language (HTML), as well as the overall structure of a Django application. I explored the Model-View-Controller (MVC) pattern for web applications and how it relates to Django. I also learn how to deploy a Django application using a service like PythonAnywhere so that it is available over the Internet.
